

# Instant Information

Technology has allowed us to become an immediate society. Use this to your advantage with our new mobile marketing service. The process is simple. Agents add a sign rider with a property identification code and a short code to their For Sale sign. Potential home buyers then send a text message such as (message) "JBLUE" to (number) "43766". Within seconds detailed property information is delivered to their cell phone. Agents may even use the code on their virtual tours and print ads!

The potential homebuyer immediately has the information they need to pursue a property. This service can be accessed twenty-four hours a day seven days a week. The Real Estate agents control the information in the download. It can include prices, features, and direct web links to photographs, as well as, agent contact information.

**"The Internet's best marketing tool since the Virtual Tour!"**
